

WORK HEALTH SAFETY AND ENVIRONMENT POLICY

Philosophy

At Australian Naval Infrastructure (ANI) we are committed to achieving and maintaining a high standard of health and safety in the workplace, and minimising the impact of our operations on the environment.

Health, safety and protection of the environment is a shared responsibility of everyone in the workplace.

Policy

ANI will promote a strong and consistent safety culture across our operations, including with our employees, contractors, facility users and visitors to our sites.

Safety will be at the forefront of our minds in all decision-making processes and business planning.

We will understand and manage the impact of our operations on the environment and will comply with all relevant environment, health and safety laws.

We will set, measure and review health, safety and environmental objectives and targets, and monitor our effectiveness.

Governance

The Managing Director & CEO will review the effectiveness of this policy, and periodically report to the Board on our safety and environmental performance and risk management.

David Knox

Managing Director & CEO
